

Spay / Neuter Voucher Program

Congratulations on the adoption of your new kitten! With your adoption papers you will receive a voucher towards the spay or neuter of your kitten.

There are many veterinarians in the Barrie area that are accepting the voucher. It is your responsibility to contact the veterinarians to find out which ones are participating in this program and will accept this voucher as a partial payment for the spay / neuter.

Your **female** kitten will be ready for spaying at 5 to 6 months old. Your **male** kitten will be ready for neutering at 4 to 5 months old. Before your kitten can be spayed or neutered, all vaccinations must be up-to-date (please see the medical record you were given at the time of adoption). Furry Friends has provided your kitten with its first set of vaccinations. Additional sets of vaccinations are the responsibility of the adopter.
